

MATLAB and Simulink Setup Guide

MATLAB and Simulink software packages are available to all UWA students and staff, allowing you to download and install these applications on your personal device.

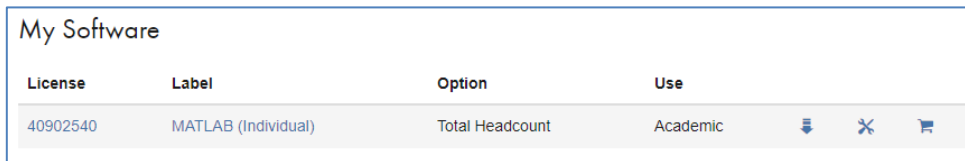

Please note that this software is only allowed for learning, teaching and research purposes – commercial use is not permitted.

1 CREATING YOUR ACCOUNT

1. Browse to the [MATLAB Portal](#), and select **Australia** if prompted.
2. Follow the **Sign in to get started** link.
3. If you've got an *existing* Mathworks account that's tied to your UWA student email address, then log in, otherwise follow the **Create Account** link.
4. Once you've registered with your UWA student email address, you'll receive an automated email; follow the **Verify your email** link to continue.
5. Fill out the required fields, and set a password (note that this is not linked to your UWA password).

2 INSTALLING APPLICATIONS

1. Once logged in, you'll be presented with a list of software available to you:

| License | Label | Option | Use |
|----------|---------------------|-----------------|----------|
| 40902540 | MATLAB (Individual) | Total Headcount | Academic |

2. Click on the download **arrow icon** to start the installation process, and follow the prompts.

3 FURTHER INFORMATION

MATLAB maintain a help centre and provide training resources that cover all of the above, along with commonly asked questions and helpful guides: [MATLAB Onramp](#)
